I am a Frontend Engineer with 2+ years of experience writing and testing code for a marketing technology company and a brick-and-click consumer electronics retailer. I've worked closely with diverse stakeholders on agile teams throughout the software development life cycle to maintain code and build tests for existing software, create new features, and migrate to newly adopted technologies or standards.

WORK EXPERIENCE

Software Engineer
Walts TV

03/2021 - 03/2022   *Tempe, AZ*
Brick-and-click consumer electronics company
Achievements/Tasks

- Led project from inception to deployment and beyond to drastically reduce time spent picking products in our warehouse. The project, which was built in React and Lumen, was described as the "most usable piece of software we've released."
- Leveraged Laravel's Commands and Queues as well as Cron jobs in older Laravel versions along with developing RESTful APIs to automate internal and third-party product inventory, listings, orders, and other portions of the order life cycle.
- Worked closely with designers and stakeholders within the organization convert fresh, more modern designs to clean and easy-to-maintain responsive web pages on or customer-facing e-commerce website.
- Collaborated in a push to expand test coverage for existing software advocated for testing as a standard.

Software Engineer
Integrate

05/2019 - 10/2020   *Phoenix, AZ*
Marketing Technology SaaS Company
Achievements/Tasks

- Worked as part of our Data Insights team to build reporting and insights solutions for B2B marketers using our software service.
- Helped develop a more usable reporting UI from a monolithic Angular page to a React microservice which decreased average user time spent building reports from 16 minutes to 6 minutes.
- Created React components using Storybook and styled-components for our internal component UI library for faster design implementation and a consistent user experience across all areas of business.
- Partnered across teams to increase unit and integration test coverage by 34% using Cucumber feature files on our .NET back end. Adopted React Testing Library and its accompanying philosophy on the front end as well.

Patient Financial Services Reconciliation QA
Banner Health

10/2014 - 10/2020   *Mesa, AZ*
Achievements/Tasks

- Analyzed insurance payments to the hospital system to ensure they complied with contractual and legal requirements, resolved accounts, and forwarded issues to the appropriate departments.
- Became SME, trained new employees, wrote training materials, and created Excel tools to assist in these tasks that were adopted by multiple departments for more accurate and efficient account review.

SKILLS

`HTML` `CSS` `JavaScript`
`Typescript` `Node` `React` `Redux`
`Express` `PostgreSQL` `MongoDB`
`PHP/Laravel` `Git`

EDUCATION

Web Development Coding Bootcamp
Galvanize

10/2018 - 04/2019
Phoenix, AZ

Associates of Arts
Chandler-Gilbert Community College

VOLUNTEER EXPERIENCE

TA for Intro to Coding Classes (11/2018 - 05/2019)
Volunteered as a TA for as many Intro to Code Meetups/Workshops as I could to help spread some coding knowledge and help empower people the way I've been empowered.

Web Developer for Non-Profit App (03/2019 - 03/2019)
AZ Give Camp hosted a hackathon where, for over 2.5 days several teams of developers, coders and digital artists helped nonprofit groups realize their digital goals.
